

Trace & Ghost Remover

Surface cleaner for removing Graffiti 'Ghost Marks'

ROCAN PRODUCTS

PRODUCT INTRODUCTION

Removes the final shadows and traces of graffiti from most surfaces, but particularly from sensitive surfaces such as signage, plastics, utility boxes, bus shelters etc.

Removes marker pens from porous surfaces such as brick, granite, marble, sandstone and concrete

APPLICATION

Best applied using a nylon brush.

Cleaning sensitive surfaces:

- Decant a small quantity in to a small plastic pot.
- After removing as much graffiti as possible using **Sensitive Surface Graffiti Remover**, apply a thick layer of **Trace & Ghost Remover** to any residual graffiti with a nylon brush. Leave it to work.
- **Trace & Ghost Remover** will fade the remaining graffiti out. Sometimes this happens over the course of a few minutes, sometimes it takes longer. This will depend upon the type of substrate the graffiti is being removed from and the type of ink being removed.

- Once the ghosting has disappeared the surface should be wiped with a damp towelling cloth to clean it off.

Cleaning porous surfaces:

- **Trace & Ghost Remover** can be used to remove the residue of marker pens from certain porous surfaces.
- First remove as much graffiti as possible using **Spraycan Paint Remover**.
- Apply a couple of coats of **Trace and Ghost Remover** to the surface and leave it to work.
- The time that it will take to work will vary from job to job. In the worst cases this may need to be re-applied over several days. If **Trace & Ghost Remover** dries out it will be necessary to rinse the dried solution off before re-applying.

Trace & Ghost Remover will not normally damage paintwork. It will however sometimes leave a light patch as it cleans the paintwork. This will generally re-oxidise back to its original colour once it has been wiped with a damp cloth and left for several minutes

PACKAGING

1 litre and 5 litre containers

COVERAGE

- The more porous the surface, the lower the coverage rate
- **Always** test a small hidden area before use.

PHYSICAL PROPERTIES

- Odour: characteristic
- pH: <12
- Soluble in water
- Specific gravity: 1.09
- Colour: Pale straw
- VOC: 0g/L
- Always consult the MSDS before use.
- Protect any surface not being treated that is in close proximity of the area.
- Never mix or add any other cleaners or acid product.

EQUIPMENT CLEANING

Clean equipment with clean warm water

STORAGE & SHELF LIFE

Store away from frost and heat in a dry place: temperature between 5 °C and 30 °C. Shelf life is 12 months from the production batch date when kept in the original unopened container.

HEALTH & SAFETY

See Material Safety Data Sheet before use.

Important: The content of this documentation is based on our experience of the product. Rocan Products Ltd guarantees the quality of its products, but expressly declines any liability in the event of failure by the user to comply with the recommendations and conditions of use of said products, notably but not exclusively in the event of incorrect application, application by unqualified personnel, use of products not compatible with Rocan's products or bad weather conditions.
